

XTRACTA X2

FUME EXTRACTOR

WITH
X-PULSE
TECHNOLOGY

MADE IN
EU

PRODUCT DATA SHEET

SMARTER FILTRATION. LESS DOWNTIME.

Engineered for demanding industrial environments, the **Betaweld XTRACTA X2** delivers a new generation of mobile fume extraction.

At its core is **X-Pulse filter-cleaning technology**, using controlled bursts of air to automatically clean the cartridge filters during operation. This helps maintain extraction performance, extend filter life and significantly reduce the need for manual filter maintenance.

Featuring a **flexible extraction arm** and **M5-class cartridge filtration**, the XTRACTA X2 is designed to capture ultra-fine airborne particles in the 0.3-1 µm range, delivering highly effective filtration while helping keep the workshop environment cleaner and safer.

The result is a smarter extraction solution built around performance, mobility and productivity on workplace safety.

KEY FEATURES

- X-Pulse Technology - automatic filter cleaning during operation
- M5-Class Filters - for highly effective filtration
- Articulated Extraction Arm allows for maximum manoeuvrability
- Filter Contamination Indicator delivers real-time airflow monitoring
- Integrated Dust Drawer - safe and easy waste disposal
- Powder-coated body offers long-life protection and durability
- Lockable Wheels - for stable and secure operation

SUITABLE FOR

• MIG • TIG • STICK • Plasma • Gouging

APPROVALS CE

W3

Rating Compliant

SPECIFICATIONS

Part No.	6066
Primary Input Voltage	240V
Motor Output	1.5kW
Plug Type	10A
ISO	F
Protection Class	IP X0
Compliance	AS/NZS ISO 21904 Series
Air Suction Rate Maximum	3000m ³ /h
Filter Efficiency	99%
Filter Surface Area	6m ²
Nominal Current	5A
Warranty	3 Years*

SIZE & WEIGHT

Machine Weight	122kg
Total Weight with Arm	139kg
Dimensions [L x W x H]:	750mm x 650mm x 1285mm

*Excludes filters

X-PULSE TECHNOLOGY

Betaweld X-Pulse technology takes productivity to the next level. XTRACTA X2 and X3 fume extraction machines are fitted with an automatic X-Pulse cleaning system that allows filter cleaning without needing to remove filters or opening the housing. The machines' compressed air inlet activates the self-cleaning system, sending a pulse of air to push dust particles out to maintain maximum extraction performance. The integrated dust collection drawer ensures safe, clean and environmentally friendly waste disposal.

PACKAGE CONTENTS

PART NO	DESCRIPTION
6066	XTRACTA X2 Mobile Fume Extraction Unit
6161	Tensioner Tire
6162	Internal Acrobatic Arm 3m
6164	Hose 153mm (3.4m)
6165	Hood Without Damper
6170	M5 Cartridge Filter (2pcs)

* Other spare parts are available upon request
