

XTRACTA X3

FUME EXTRACTOR

WITH
X-PULSE
TECHNOLOGY

MADE IN
EU

PRODUCT DATA SHEET

TWO SOURCES. ONE MACHINE.

Engineered for demanding industrial environments, the Betaweld XTRACTA X3 delivers a new generation of mobile fume extraction.

Featuring dual extraction arms and M5-class cartridge filtration, the XTRACTA X3 is capable of capturing two different fume sources simultaneously. Designed to capture ultra-fine airborne particles in the 0.3-1 µm range, the X3 delivers highly effective filtration while helping keep the workshop environment cleaner and safer.

At its core is X-Pulse filter-cleaning technology, using controlled bursts of air to automatically clean the cartridge filters during operation. This helps maintain extraction performance, extend filter life and significantly reduce the need for manual filter maintenance.

The result is a smarter extraction solution built around performance, mobility and productivity.

KEY FEATURES

- X-Pulse Technology - automatic filter cleaning during operation
- M5-Class Filters - for highly effective filtration
- Dual Articulated Extraction Arms allow for simultaneous welding
- Filter Contamination Indicator delivers real-time airflow monitoring
- Integrated Dust Drawer - safe and easy waste disposal
- Powder-coated body offers long-life protection and durability
- Lockable Wheels - for stable and secure operation

SUITABLE FOR

• MIG • TIG • STICK • Plasma • Gouging

APPROVALS CE

W3

Rating Compliant

SPECIFICATIONS

Part No.	6067
Primary Input Voltage	415V
Motor Output	1.1kW
Plug Type	10A
ISO	F
Protection Class	IP X0
Compliance	AS/NZS ISO 21904 Series
Air Suction Rate Maximum	2 x 2000m ³ /h
Filter Efficiency	99%
Filter Surface Area	6m ²
Nominal Current	5A
Warranty	3 Years*

SIZE & WEIGHT

Machine Weight	125kg
Total Weight with Arm	159kg
Dimensions [L x W x H]:	750mm x 650mm x 1285mm

*Excludes filters

X-PULSE TECHNOLOGY

Betaweld X-Pulse technology takes productivity to the next level. XTRACTA X2 and X3 fume extraction machines are fitted with an automatic X-Pulse cleaning system that allows filter cleaning without needing to remove filters or opening the housing. The machines' compressed air inlet activates the self-cleaning system, sending a pulse of air to push dust particles out to maintain maximum extraction performance. The integrated dust collection drawer ensures safe, clean and environmentally friendly waste disposal.

PACKAGE CONTENTS

PART NO	DESCRIPTION
6067	XTRACTA X3 Mobile Fume Extraction Unit
6161	Tensioner Tire
6162	Internal Acrobatic Arm 3m
6164	Hose 153mm (3.4m)
6166	Hood With Damper
6170	M5 Cartridge Filter (2pcs)

* Other spare parts are available upon request
